

**Miranda Frost**  
**Specialist Leader of  
Education**

*"I have worked at Haygrove School in a variety of capacities for 23 years and have a real passion for effecting change in the young people we work with. I have spent many years practicing and perfecting the skills required to be an accomplished classroom teacher and this led me to take a key role in mentoring trainee teachers, newly qualified teachers and teachers further on in the career that needed support to improve. I still enjoy the challenge that the classroom brings and welcome new ideas and further development of my teaching pedagogy. I know that continual change and development is required to maintain exceptional results.*

*Within my time at Haygrove I have been a key member of the Science team including Head of Science in recent years. During these years we were consistently in the top three schools in Somerset for exam results and the thought of sharing some of the strategies used to allow more children to enjoy and succeed in science was a driving force when I considered becoming a SLE.*

*I have always wanted to ensure our disadvantaged students have the same opportunities as our more fortunate and this has led me to move to a pupil premium coordinator role in the last 12 months. I have taken a seconded role on the senior leadership team to help drive this priority forward. This has allowed me to consider progress for students across all subjects and this deeper understanding of the wider curriculum has helped me recognise the needs of students and the best ways to support them overcome a variety of barriers. These strategies are transferable to all our students.*

*My competitive nature has allowed me to find ways to further achievement in a variety of tasks. I thoroughly enjoy seeking ways to make marginal gains and the real reward comes when others accomplish their goals. I have been able to see this with students overcoming barriers as well as teachers achieving beyond their expectations.*

*I would be very happy to work with others to share my ideas.”*
